Table of Contents

Screenshots

Frontend

Illustration 1: Repertoire list view

Live example: http://www.bat-berlin.de/repertoire/

1. Search form

2. Select box for categories. You can extend the categories i.e. with producers or types among others.

3. A-Z-Browser

Some properties are configurable in the backend user interface with a mouse click.

Illustration 2: Repertoire single view

Live example: http://www.bat-berlin.de/repertoire/stueck/leonce-und-lena/

1. Calendar items
Expired dates get another CSS class

You can design each record – each repertoire item – individually.

Illustration 3: Calendar with repertoire items (list view)

Live example: http://www.bat-berlin.de/

1. Search form

2. Category menu. You can extend the categorie menu i.e. with producers or types among others.

3. Select boxes with categories. You can extend it with more select boxes.

Illustration 4: Calendar with repertoire item (single view)

Live example: http://www.bat-berlin.de/termin/leonce-und-lena-2/

1. Form for ordering a reservation (online ticket).

2. Link to the shopping cart.

Backend

Illustration 5: Repertoire list view
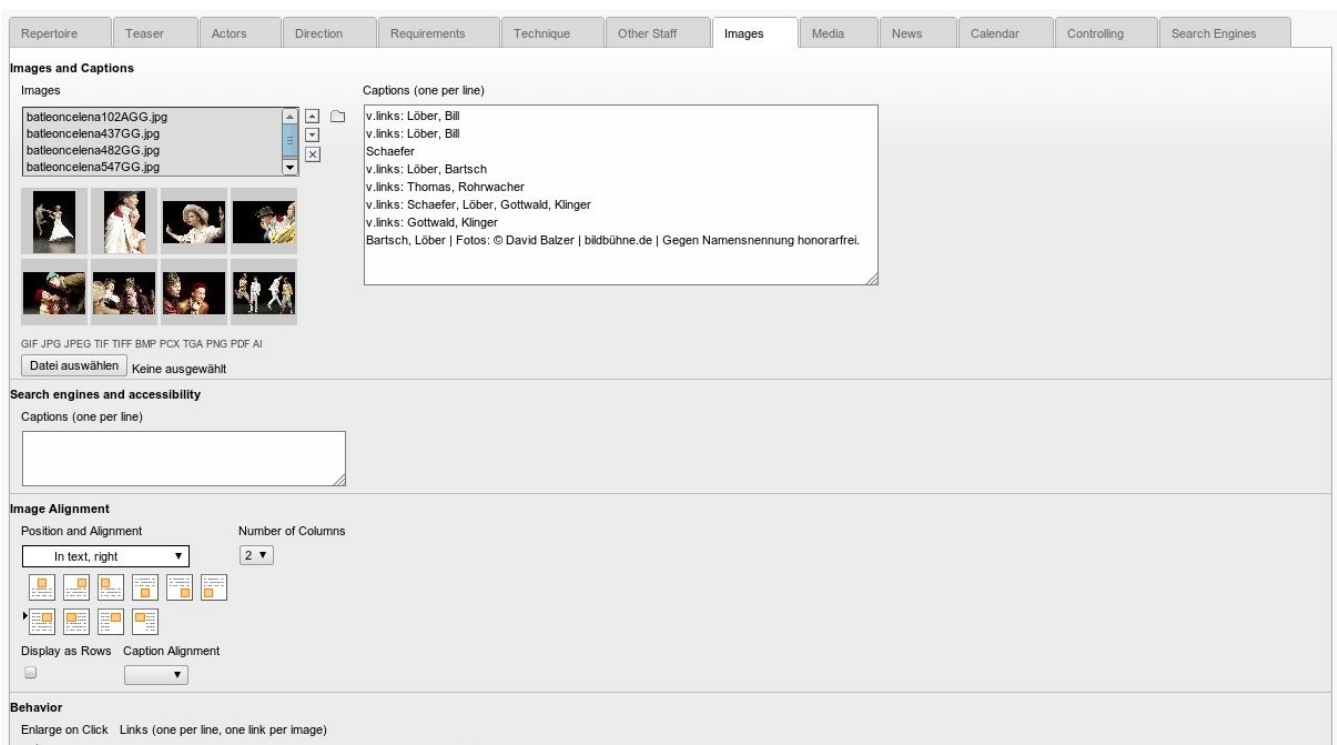

Illustration 6: Repertoire single view

- Repertoire is based on a very complex database. You can take in a lot of data (see the amount of tabs!)
- The current tab (Images) demonstrates the design possibilities: there are 10 layouts.
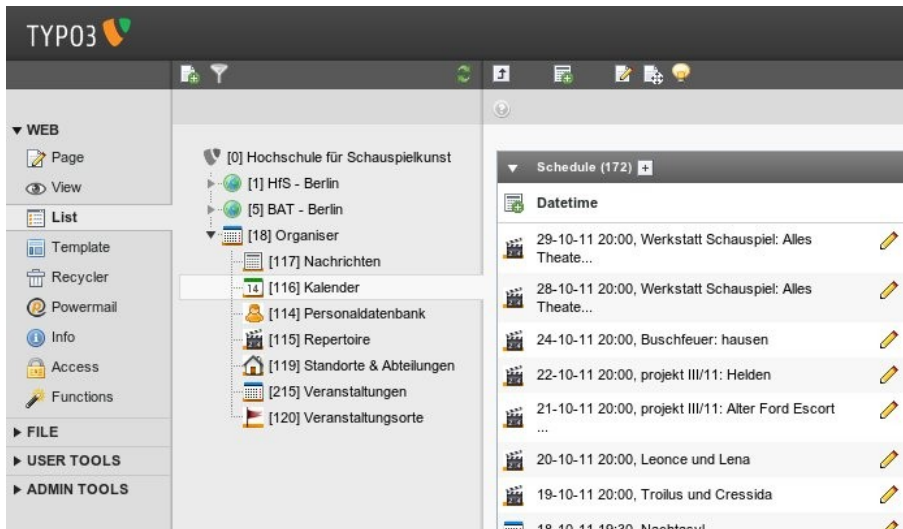

Illustration 7: Calendar list view with repertoire items among others.

- Org +Repertoire extends the Organiser (org) with a database and a lot of properties for repertoire.

Illustration 8: Calendar single view. You can link to a repertoire item directly

1. Org +Repertoire extends the Organiser (org). After installation there is the new event data type "Take it from repertoire"

2. If you have selected the event data type "Take it from repertoire", the select box with the repertoire items will appear.

Introduction

What does it do?

Org +Repertoire extends Organiser (org) with a database and properties for managing a repertoire.

A repertoire item is a special type of a calendar item like an event.

But it has additional appropriate fields like subject, requirements and actors.

It is connected with the fe_user table.

Workshops blends in the calender items both in the back-end and in the front-end. For that Org +Repertoire is distributed with default templates for HTML and TypoScript.

Org +Repertoire isn't localised.

What do you need?

- A TYPO3 installation with an entire Organiser (org) installation.

Audience

- TYPO3 integrators
- Professional TYPO3 developers, TYPO3 agencies
- Actors, producers, organisers, theathre

Quick Installation

1. Install Org +Repertoire and configure some options in the Extension Manager.

2. Add and configure a sysfolder in the page tree.

3. Complement your TypoScript configuration.

4. Add a page in the page tree and insert the needed plugin "browser".

5. Insert your workshop data.

Installation

There is another extension Org +Workshops, which is similar to Org +Repertoire.

Please refer to that manual. See:

- http://typo3.org/extensions/repository/view/org_workshops/current/

Thank you for your understanding, that we can save a lot of work.

Helpful suggestions and benefits

Forum

If you have helpful suggestions, feel free to publish any question or code snippet on

- TYPO3 Organiser forum at
  http://typo3-browser-forum.de/

Posts are welcome in English and German.

TYPO3 Forge

Bugs and Feature requests can be posted on TYPO3 Forge too:

- http://forge.typo3.org/projects/show/extension-org_repertoire

Sponsoring

Do you like to subsidise the TYPO3 Organsier project? Please visit

- TYPO3 Organiser Sponsoring
  http://typo3-organiser.de/sponsoring/

We would be very happy.

To-Do List

Add localization to workshop tables.

Further Information

Other extensions published by Die Netzmacher

- Browser - the TYPO3-Frontend-Engine. The Browser is the fast way for your data to the TYPO3 frontend. It displays content from related tables. You need 1 line TypoScript for a result list with a search form, a record browser and an a-z browser. Images are wrapped self-acting. SEO, Search Engine Optimization, is integrated.
  http://typo3.org/extensions/repository/view/browser/current/

- Green Cars (Grüne Autos) - Database optimized for ecological cars. It is a case study and demonstrates, how to get a complex database with the browser (see above) in three hours only.
  http://typo3.org/extensions/repository/view/green_cars/current/

- Jobmarket is a catalogue with job offers. Views, the a-z-browser, the page-browser, the search, social bookmarks and a lot of other stuff can configured by the Browser plugin with the mouse. Job Market hasn't any PHP code, it should be easy to adapt it to your needs.
  http://typo3.org/extensions/repository/view/job_market/current/

- Juridat - Database for Juridical Data. Juridat provides a juridical data base with backend functionality. Juridat is out of the box. It is a teamwork with the Browser.
  http://typo3.org/extensions/repository/view/juridat/current/

- logical_form: A frontend plugin for evaluating forms. I.e you can evaluate mail addresses.
  http://typo3.org/extensions/repository/view/logical_form/current/

- Organiser provides a lot of features for handle news, events, staff, headquarters, locations, repertoire, workshops and a calendar. Sell your online tickets! Available from April of 2011
  http://typo3-organiser.de/

- Majordomo: For subcribing to and unsubscribing from a majordomo mailing list.
  http://typo3.org/extensions/repository/view/majordomo/current/

- Quick Shop (extkey: quick_shop): The fastest shop in the history of TYPO3. Install it with one mouse click only! Quick Shop is based on the browser (see above) and powermail.
  http://typo3.org/extensions/repository/view/quick_shop/current/

- PDF Controller (pdfcontroller) - Offer your HTML page for PDF download. Controll the conversion with the integrated user interface.
  http://typo3.org/extensions/repository/view/pdfcontroller/current/

- seo_dynamic_tag: Search Engine Optimisation. You can generate values dynamically with this extension especially for the <title>-tag, for the <meta>-tag description and the <meta>-tag keywords.
  http://typo3.org/extensions/repository/view/seo_dynamic_tag/current/

- tt_news Marker (extkey: ttnews_marker) enables to add any marker to a tt_news HTML template including links. Any marker has the std_wrap property.
  http://typo3.org/extensions/repository/view/ttnews_marker/current/

- tt_news select configuration (extkey: ttnews_selectconf) enables to select tt_news by any SQL clause. The extension adds an andWhere clause to the SQL query of the tt_news plugin. I. e. it is possible to display tt_news items in dependence on the ownership of a fe_user.
  http://typo3.org/extensions/repository/view/ttnews_selectconf/current/

- Wine Catalogue provides a data base for wine with regions, wineries, styles, variety and ageing among others. It is localized. English, German and Spanish ist of the box. Wine based on the extension browser (see above).
  http://typo3.org/extensions/repository/view/wine/current/
